

## Secure Logistics completes the first-ever iSHARE transaction

Delft, 19 July 2019 – **Secure Logistics – a supplier of identification and access systems in the logistics sector – has scooped the honour of being the first company in the Netherlands to share data in line with the uniform set of agreements that make up the iSHARE Scheme. This first-ever iSHARE transaction is a perfect fit with Secure Logistics’ strategy of improving efficiency in the ports, logistics and manufacturing sectors through greater standardization.**

After adapting its XS-Key software in line with the iSHARE Scheme’s technical specifications, Secure Logistics has become the very first organization to successfully connect with the iSHARE Scheme Owner.

The XS-Key software allows Secure Logistics’ customers to give people who are in possession of an XS-Key (CargoCard, PortKey or Digital Safety Passport) access to secure locations. Before an XS-Key is made available, Secure Logistics validates the identity of the requestor.

iSHARE enables Secure Logistics to offer its customers extra added value. Thanks to iSHARE, customers such as container terminals and ports no longer need to set up a tailor-made connection when they want to integrate with the IT systems of Secure Logistics or other participating organizations. This saves them considerable time and money.

For Secure Logistics, this milestone is an important first step towards becoming an iSHARE Identity Provider. iSHARE is helping to increase the interoperability of the Secure Logistics identities, making it easier to use them to gain access with multiple partners.

This first-ever iSHARE transaction was completed in a trial setup. Secure Logistics’ customers are expected to be able to reap the first benefits of the software powered by iSHARE in 2019.

### **About iSHARE**

iSHARE is an innovative project from the Neutral Logistics Information Platform (NLIP) – a Dutch Top Sector Logistics initiative. It will soon enable everyone in the logistics sector to share data with everyone else in a uniform, simple and controlled way. This includes with hitherto unknown parties.
